Summary

SQA Engineer specialising in test automation and performance engineering, with hands-on experience building end-to-end Playwright frameworks, designing K6 load/stress/spike test suites, and wiring CI/CD pipelines via GitHub Actions and Jenkins. Comfortable across the full testing stack — from manual test planning and API validation with Postman/Newman to security scanning with OWASP ZAP. I ship reliable, documented test pipelines and catch critical defects early in the cycle.

Experience

unidevGO Software Solutions Ltd.

Feb 2026 – Present

Jnr SQA Engineer — Remote, Dhaka, Bangladesh

- Read through SRS documents and put together test plans that covered every requirement without gaps.
- Wrote and ran test cases for functional and regression cycles; caught several critical bugs early.
- Tracked and reported bugs in Jira with clear reproduction steps, then re-tested after each fix was deployed.
- Ran API tests in Postman and Newman, checking response data, status codes, and schema accuracy.
- Built end-to-end automation scripts in Playwright using a Page Object Model structure.

Projects

Web Automation Framework | *Playwright, JavaScript*

[Github Link](#)

- Built a full E2E framework with POM structure; used async/await and Playwright's auto-wait to keep tests stable.

Restful-Booker API Testing | *Postman, Newman*

[Github Link](#)

- Wrote 20+ test cases for CRUD endpoints, validated schemas and status codes, exported HTML reports via Newman.

Evershop E-commerce Testing | *Postman, Jira, Manual Testing*

[Github Link](#)

- Covered functional, UI, and regression scenarios; reported all bugs in Jira with steps and expected vs actual results.

DriversLesson Performance Engineering | *K6, GitHub Actions, Jenkins*

[Github Link](#)

- Ran Load, Stress, Spike, and Soak tests with K6; produced HTML performance reports.

SQA Performance Appraisal Testing | *Manual Testing, Test Scenarios*

[Github Link](#)

- Designed comprehensive manual test plans and functional test scenarios to evaluate performance evaluation metrics and workflows.

CraftersLab Web Extension QA | *UI/UX Testing, Functional Testing*

[Github Link](#)

- Performed strict end-to-end quality assurance validation on browser-based extension interfaces for responsiveness and logic.

Technical Skills

Testing: Manual, Functional, Regression, API, Performance, Database

Automation: Playwright (JS/TS), Selenium

Performance & Security: K6, JMeter, OWASP ZAP

Mobile: Android Testing, Appium

CI/CD & Tools: GitHub Actions, Jenkins, Postman, Newman, Jira, TestRail, Git

Concepts: SDLC, STLC, Agile Scrum, Bug Life Cycle

Languages: JavaScript, TypeScript, SQL

Professional Certificates

Ostad — 6 Months | *Manual & Automation Testing*

Education

National University

2026

B.Sc. in Computer Science & Engineering — Dhaka, Bangladesh
